

# CONVERT 2/3

## PITCHING INSTRUCTIONS

Congratulations on the purchase of your new Sierra Designs tent! In order to familiarize yourself with your new tent, we recommend you “test pitch” it before embarking on your wilderness adventure.

**PACKAGE INCLUDES:** Tent body, rain fly, 3 poles, guy cords, V-stakes, storage bag, and pole bag with stake pocket.

**STEP 1:** Find an even piece of ground; be sure area is clear of debris. Layout your tent as shown. Stake the 4 corners and 2 center loops (circled).

**STEP 2:** Assemble hubbed poles. Locate the YELLOW pole ends and insert into tent corners with YELLOW SD Anchors/webbing. Attach TIP CLIPS to center pole tips. Make sure long center pole is on TOP.

**STEP 3:** Assemble single yellow pole. Locate center of pole and clip it into Hybrid Hub. Insert pole tips into yellow SD Anchor.

**STEP 4:** Connect Split Clip and Tent Lite hooks to tent poles.

**STEP 5:** Lay the rain fly over the tent body matching the RED corner of the tent with the RED corner on the fly. On the UNDER side of the fly, attach Tip Clips at front and rear of tent then wrap the 10 Velcro loops around tent poles at guyout points. NOTE: this will ensure proper fly tensioning.

**STEP 6:** Attach fly cord loop around pole tip at all stake out points. Adjust tension by pulling down on String Lock cord

**STEP 7:** The Convert tents feature a removable vestibule. To attach, zip the end of the vestibule to the zipper track on the right side of the tent door. Assemble blue pole and insert pole tip in grommets with blue webbing. Connect Tent Lite and Split Clips to pole. Stake out the vestibule end/sides and your tent is completely set up.

## CONVERT 2/3

USING YOUR TENT

**GUYING OUT YOUR TENT:** Your tent includes attached guylines and stakes. It is good practice to always guy out your tent, but is absolutely necessary when it's windy.

Guy out your tent in the 8 locations shown below to prevent pole rotation/breakage during high winds.

Use the black Triangle Stopper to adjust the length of the guy line.

Slide rings are used to triangulate upper and lower guyouts.

**WATERPROOF DOOR:** The Convert 2/3 tents feature a waterproof door so the front vestibule can be left behind to save weight.

**BREATHABLE BODY FABRIC:** The Convert 2/3 tents feature breathable 20d polyester body fabric instead of traditional mesh to keep the snow and dust out.
