

THINK OUTSIDE

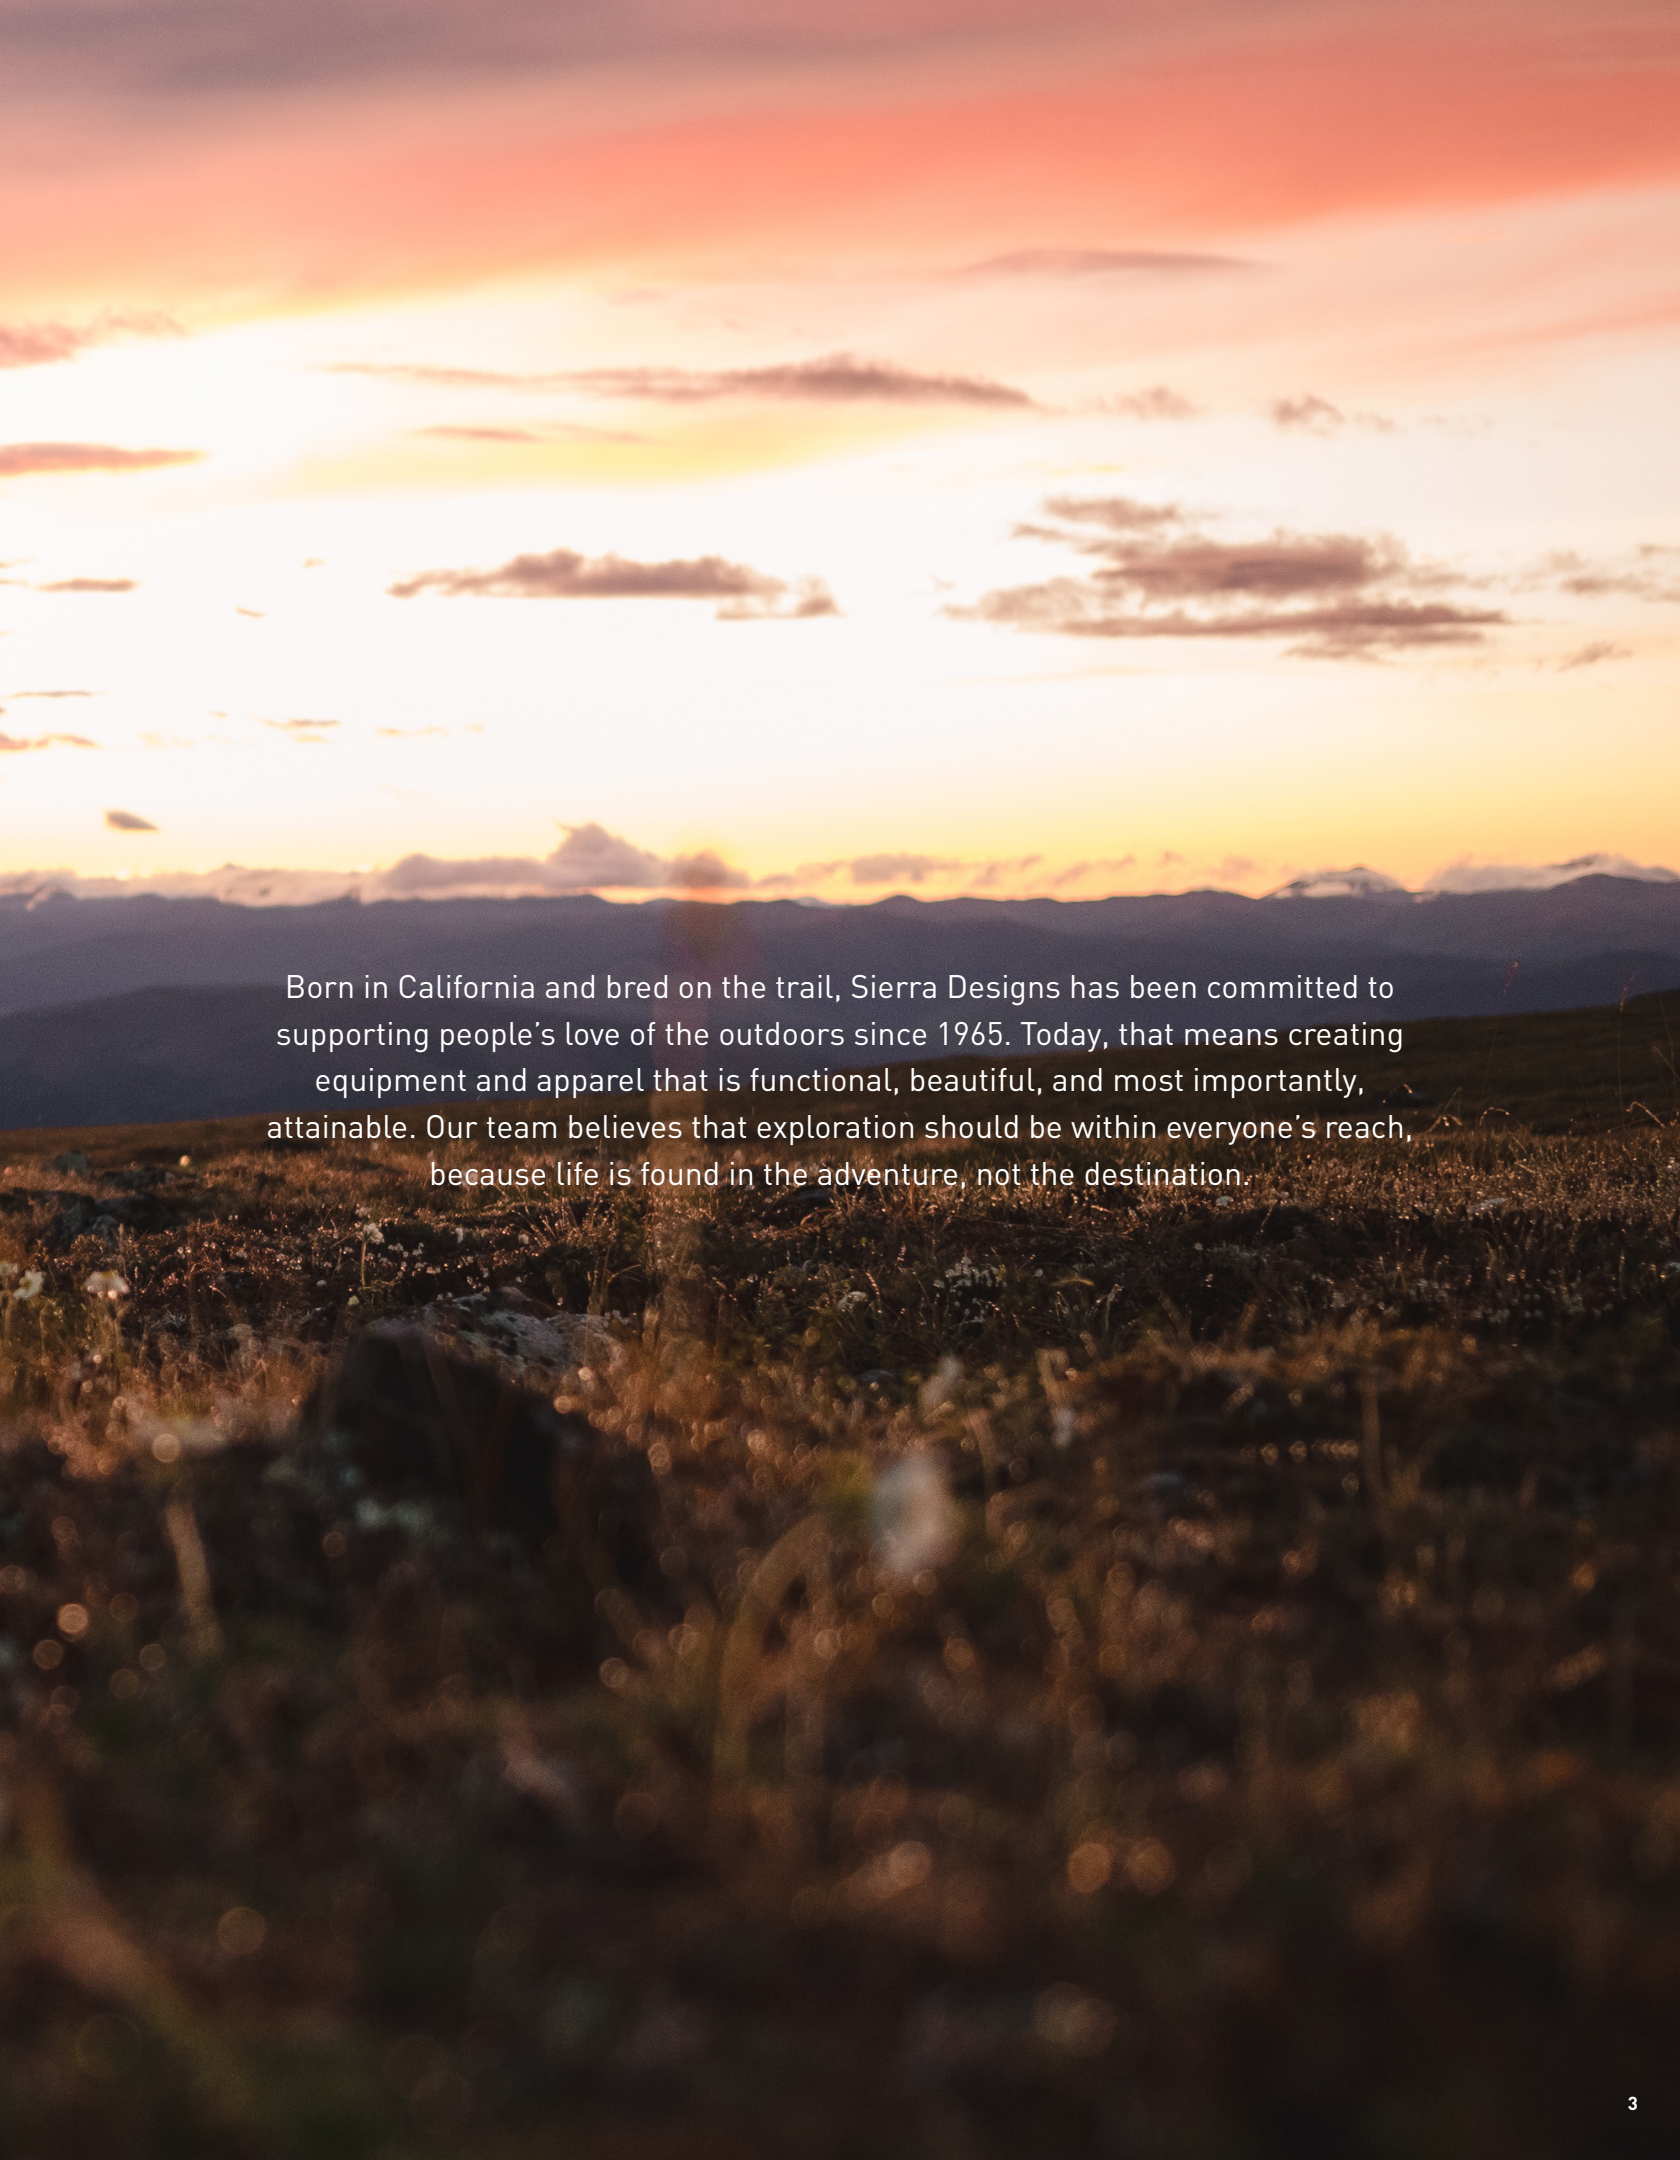

SIERRA DESIGNS

SINCE 1965

SPRING 2020

Born in California and bred on the trail, Sierra Designs has been committed to supporting people's love of the outdoors since 1965. Today, that means creating equipment and apparel that is functional, beautiful, and most importantly, attainable. Our team believes that exploration should be within everyone's reach, because life is found in the adventure, not the destination.

P. Kestwauz *Gene R. Mander*

A BRIEF HISTORY

The foundation of Sierra Designs

Sierra Designs was founded by Bob Swanson and George Marks in 1965 on the premise that all people deserve to have good gear for exploring the outdoors, regardless of their background or experience level. Taking their years of adventures together out on the trail and putting it directly into the products they made, Sierra Designs pioneered many of the outdoor innovations taken for granted today.

Swift clips on your tent? We did that. The 60/40 Mountain Parka? We did that. Women specific sizing and needs? Yep, we did that, too. In fact, we've held hundreds of patents (and some pending) that have made getting outdoors easier and more enjoyable.

It's about more than just great product, though – it's about the passionate people who think it up. The original SD team of Bob and George ballooned to twenty eight full time employees by 1968 – even George's mom helped out in the sewing department. When we say, "family affair," we mean it literally.

That was then, in our original former paint factory Berkeley, CA headquarters. Today, our home base

is shared between Pasadena, CA and Boulder, CO, but our mission hasn't changed at all - Sierra Designs continues to be a place where you can find happy dogs (lots and lots of happy dogs), new ideas, always-reliable camping gear, and good to the core people who are always down to Think Outside.

After all, we've been encouraging wanderlust since 1965, and we see no reason to stop now.

PUSHING THE LIMITS

The Pushing The Limits collection is for the customer who is looking to reduce weight in their backcountry setup as an upgrade, or looking to start off with gear they'll never need to upgrade. Built for the long haul, we cut weight where we can through design, material usage, and unique construction, yet we still give you enough room with the right features, to be comfortable out on the trail. If you're looking to shed a few pounds from your pack, the Pushing The Limits Collection is the answer.

PTL SLEEPING BAGS

Pushing the Limits bags take the unique design aspects that make our bags so comfortable, and tweak them to retain comfort but cut some weight. Built with lightweight 800 Fill Power DriDown and nylon fabrics, these bags bring incredible comfort at incredibly light weights and turn heads in the category. Ultralight, meet ultra comfortable.

PTL PACKS

Versatility and stable carry define the Pushing the Limits series of packs. The adjustable volume Flex Line gives you a single bag to fill many roles. The Flex Capacitor offers expandable volume, comfortable suspension, and light weight, giving you a pack that's ready for the long haul, or the short haul.

PTL TENTS

Pushing the Limits tents are designed to be the lightest tents in our line, without sacrificing space. Lightweight nylon materials and featherlight aluminum pole sets run through this line, to decrease weight and packed size. Positioned as lightweight, spacious, and attainable ultralight tents, these should serve the avid adventurer well.

PACK N' GO

The Pack N' Go Collection is built for the customer looking for incredible value in their backcountry or car camping setup. The weights are trail friendly, the materials and sizing are comfortable and durable, and the pricing makes getting outside accessible. Whether it's someone looking for a more comfortable sleeping bag, or shopping for a first backpacking tent, the Pack N' Go collection answers the call.

PNG SLEEPING BAGS

Backcountry, Frontcountry, and everywhere in-between, the Pack N' Go collection of sleeping bags will keep you cozy no matter where you go. With options consisting of down, synthetic, single, and doublewide, there's options for every type of sleeper, and every type of budget.

PNG TENTS

The Sierra Designs Pack N' Go family of tents is built to get you out on the trail with a tent you can stretch out in, while still being light on your back, and your wallet. This collection includes best sellers like the Clip Flashlight 2, as well as new releases like the massive Clearwing 2/3.

Explore which Pack N' Go tent is the right fit.

BACKPACKS

BACKPACK INNOVATIONS

No matter what you're carrying, our packs will "flex" to fit your needs, so you can worry about your hike, not your pack.

FLEX GUSSET

The capacity of your pack is up to you with the patent-pending flex gusset found in the Flex Capacitor. The horizontally expanding gusset changes the volume of the pack, to perfectly fit any load the pack can carry. Rather than just compress the pack, you're able to tailor the pack to fit your needs

Y-FLEX DAC

A central aluminum hub and 3 separate stays allow our Y-Flex DAC suspension to comfortably carry any load. The Y-Flex adds lightweight support to the Flex Capacitor, and lets the lightweight bag hit above its weight class with comfortable carry.

Learn more about our innovation and tech through our [Training Portal](#)

FLEX CAPACITOR

Big, small, it does it all.

Meet the pack that does it all. The Flex Capacitor family of packs feature adjustable volume to handle both short and long hauls, and a Y flex suspension system that carries above their weight class. With three sizes in a 25-40, 40-60, and 60-75 L capacity, there is a flex pack to fit your needs. A bucket lid with a stash pocket closes everything up, while dual stretch pockets on the shoulder straps and side of pack cover shove it needs.

KEY FEATURES

- Expandable Volume
- 2 stretch mesh side pockets
- 2 stretch mesh hydration pockets on shoulders
- Zippered hipbelt pockets
- U shaped top access zipper
- Small stash pocket in lid
- Ultralight weight
- Lightweight "Y" Flex DAC suspension

FLEX LUMBAR

Takes weight off your back and onto your backside.

The Flex Lumbar collection takes the same expanding gusset found in our Flex Capacitor, and shifts it vertically to work as a lumbar pack. Integrated water bottle pockets and enough room to stash a layer and some food means you have your bases covered for any day hike. Flex it open when you need to carry more, or cinch it down when you want a lower profile pack.

KEY FEATURES

- Stretch mesh water bottle pockets
- Zippered valuables pocket
- 1 Main Compartment, 1 hidden top zipper
- Vertically expandable volume
- Dual compression straps to stabilize load
- Padded hip belt for on trail comfort

SLEEPING BAGS

SLEEPING BAG INNOVATIONS

From self-sealing foot vents to integrated comforters, we've been making sleeping outside a whole lot more comfortable.

ZIPPERLESS

We've ditched the zipper on some of our bags, and instead replaced it with an oversized comforter that mimics your bed at home. Without a zipper, you can move about freely and sleep how you want without restriction and with more comfort. The comforter seals up with the rest of the bag and keeps heat in due to its oversized nature.

SELF-SEALING FOOTVENT

Sierra Designs sleeping bags feature our patented self-sealing footvent, to make easy venting a breeze. The footvent allows you to kick your feet out of the bag to cool off a bit, and seals up when not in use to retain heat on chilly nights.

DRIDOWN™

DriDown™ is natural down insulation treated with a molecular level polymer, creating a hydrophobic finish on individual down plumes. All Sierra Designs down is DriDown™, and the result is insulation that stays dry longer, lofts better, and dries faster than untreated down PFC Free: All Sierra Designs sleeping bag fabrics and DriDown™ insulation are entirely PFC free, so you can sleep soundly.

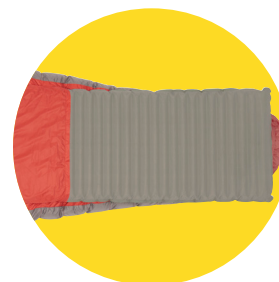

HIDEAWAY HOOD

Quilts with our hideaway hood give you the option of using a quilt like a blanket, or like a bag. When not in use, the hood simply seals up and is out of the way to allow use just like a blanket, but when needed, allows you to use the quilt like a mummy bag to keep your head warm.

HAND POCKETS

To help seal everything up in our zipperless bags, we have hand pockets located high on the integrated comforter. Just slip your hand in, and you can pull everything nice and tight around you. These are a side/stomach sleepers dream!

PAD SLEEVE

Bags with our pad sleeve allow you to insert your sleeping pad into the back of the bag. This keeps you from slipping off of your pad, prevents the bag from twisting, and replaces unnecessary bottom insulation to save weight, and overall gives you a more comfortable night's sleep.

Learn more about our innovation and tech through our [Training Portal](#)

CLOUD

So comfortable, it's like sleeping on a cloud.

Welcome to the most comfortable night's sleep you'll have in the backcountry. Hailed as Outside magazine's "Best Sleeping Bag For Backpacking" and an evolution of our award winning Backcountry Bed, the Cloud features a zipperless design with an integrated comforter. Constructed with 15d nylon ripstop fabrics and 800 fill power DriDown™, delivering an ultra comfortable lightweight mummy. To top it off, the Cloud touts our patented self sealing foot vent and a pad sleeve, allowing you to vent heat and move around without worry.

KEY FEATURES

- 800 Fill Power Fluoro-carbon free DriDown & 15d nylon ripstop fabrics for an ultralight weight bag
- Patent pending zipperless design provides an ultra comfortable lightweight mummy
- Oversized integrated comforter gives all the comforts of your bed at home Insulated shoulder pockets keep comforter wrapped around you and seals out drafts
- Patented self-sealing foot vent provides fast and easy ventilation
- Sleeping pad sleeve keeps pad under you for comfort and warmth, and replaces unnecessary bottom insulation

NITRO

The epitome of lightweight comfort.

A lightweight mummy with some tricks up its sleeve, the Nitro brings the classic mummy shape back at an impressively low weight, with incredible comfort. With a simple construction and lightweight materials, the Nitro comes in punching above its weight class, and still features our self sealing foot vent for comfort.

KEY FEATURES

- 800 Fill Power fluoro-carbon free DriDown™ & 15d nylon ripstop fabrics for an ultra lightweight bag
- Draft dodger collar that helps prevent drafts
- Patented self-sealing foot vents provide fast and easy ventilation
- 5" baffle spacing and side wall baffles keep you warmer by keeping down from shifting

NITRO QUILT

Blanket or Bag? You decide.

Part blanket, part bag, all cozy, the Nitro Quilt brings the best of both worlds together in this backcountry collision of features. With an integrated hood plus a hand/arm pocket, you can seal in warmth and still have room to move around.

KEY FEATURES

- 800 Fill Power fluro-carbon free DriDown™ & 15d nylon ripstop fabrics for an ultralight weight bag
- Oversized design and larger size for more coverage and more comfort
- Full-length, insulated hand/arm pockets help to seal out drafts and seal in warmth

SYNTHESIS

Ultralight features. Ultralight price tag.

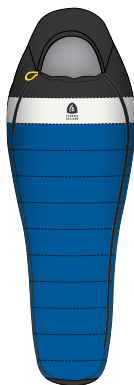

Built with SierraLoft synthetic insulation and lightweight material typically reserved for a higher price point, the Synthesis packs light but hits heavy with its feature set. A dual zipper system makes getting in and out a breeze and gives you room to move about, while the self sealing foot vent lets you vent heat with ease.

KEY FEATURES

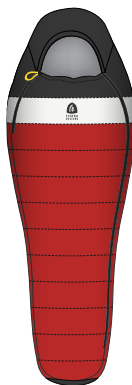

- SierraLoft synthetic insulation provides lofty warmth
- Dual zipper system for ease of use
- Patented self-sealing foot vents for fast and easy ventilation
- Draft dodger collar helps prevent drafts
- 20D nylon ripstop fabrics for lightweight versatility

TENTS

TENT INNOVATIONS

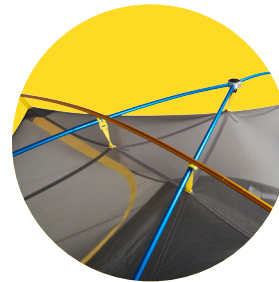

In addition to being roomy and lightweight, Sierra Designs tents have some tricks up their sleeves, like stargazer rainflies and porchable vestibule awnings.

SWIFT CLIPS

Swift clips replace traditional pole sleeves to reduce weight and make setting up your tent a breeze. Once staked out, you can set up a tent in under 20 seconds. Seriously.

DAC ALUMINUM

We utilize DAC aluminum pole sets in our tents, to give you lightweight rigidity you can trust out on the trail.

STARGAZER FLY

Tents with our stargazer fly feature let you roll up the fly and remain partially covered, so you can have unobstructed views of the night sky.

BURRITO BAG

Sierra Designs tents feature our burrito bag, allowing you to put your tent away, even with a less than stellar roll. Simply drop your tent in, cinch the cord, and pull the compression straps. No more fighting with a stuff sack!

PORCHABLE AWNING

Tents with porchable awnings have a purpose built vestibule panel, that when paired with trekking poles, allows you to guy out an awning for additional shade and ventilation.

EASY ON FOOT

Sierra Designs tents feature an aluminum foot that pair with special ends on our pole sets. Once pressure is applied, the poles lock into place and resist popping out, to aid in stability and ease of setup.

Learn more about our innovation and tech through our [Training Portal](#)

CONVERT 2/3

4-Seasons of freestanding protection.

Our Convert tents have been redesigned to offer a fully removable fly and larger vestibule, making them even more versatile than their predecessors, while still remaining of the lightest weight, most livable four season tents on the market. With the ability to fully seal up, the Convert also makes a killer desert tent.

KEY FEATURES

- Breathable 20d poly body fabric keeps snow and dust out
- Oversized vestibule adds space, and is removable to save weight
- Fully removable fly is great for lightweight desert adventures
- 20d nylon fly fabric gives you one of the lightest 4 season tents on the market
- Generous livable space gives you plenty of space for you and your gear

MOUNTAIN GUIDE TARP

Built to weather change through all seasons.

Designed to handle extreme wind, snow, and rain, the Mountain Guide Tarp is a durable floor-less shelter durable enough for any weather, in any season. With a central telescoping DAC aluminum pole, the Mountain Guide Tarp offers a simple set up and adjustment for summer or winter use.

KEY FEATURES

- Telescopic center pole gives 10" of adjustment for winter or summer use
- Roll-back main door provides greater ventilation in good weather
- Zippered side port gives quick access to gear
- Roof vent fends off condensation
- Snow flaps block out spindrift

METEOR LITE 2/3

Extend your journey, extend your stay.

Your new home away from home, the Meteor Lite is an update to our time-tested Meteor, with lightened, upgraded materials to take some weight off your back. The strong, fully freestanding design touts 2 doors and 2 vestibules with a footprint that allows you to spread out, giving you plenty of room for gear and a versatile pitch that works anywhere.

KEY FEATURES

- Fully freestanding for versatile pitch and ease of use
- Full coverage fly with rollback stargazer feature for ventilation and night sky views
- 2 door 2 vestibule design for ease of use and gear storage
- Hubbed pole structure with ridge pole to make vertical walls
- Prebends for increased internal area at head and feet

Pack Weight 4lbs 6oz / 2kg

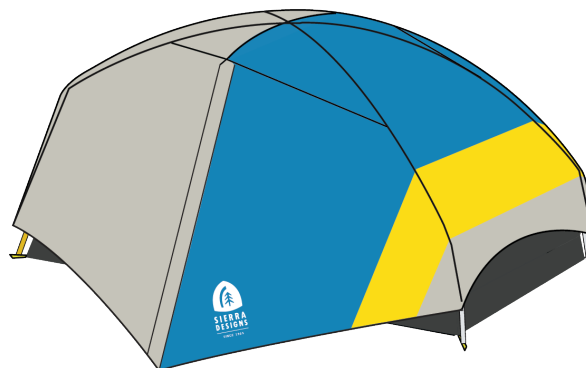

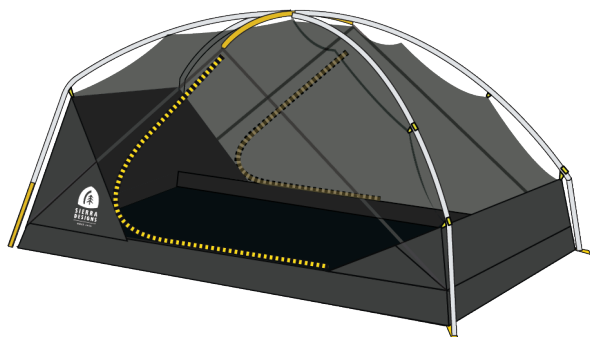

Min Weight 3lbs 14oz / 1.78kg

Dims 70" x 84" / 177x213 cm

Area 40.8 ft² / 3.79 m²

Peak Height 42" / 106cm

40155520

STUDIO 2/3

Studio space is the new home of livable space.

Designed to be the lightest weight 2 and 3 person tents in the SD line, the Studio provides ultralight weight and maximum livable space. With a 1 door and 1 vestibule configuration creating a vertical door, there's more than enough room for you, and your gear. And, with a semi-freestanding design, setup is quick and simple.

KEY FEATURES

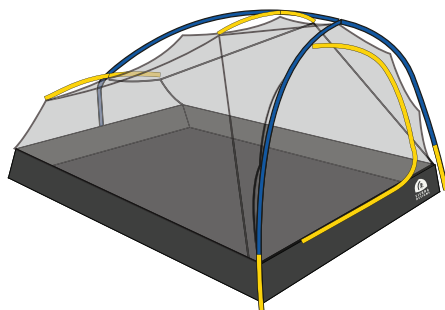

- Generous "livable" space for a minimum weight
- Custom 160 degree aluminum hub creates a near vertical door
- Large full coverage single vestibule provides ample storage space
- Compact storage size takes up a minimal space in your pack
- Fast & Easy hubbed pole setup
- Burrito bag makes storing tent easy

STUDIO 2

Pack Weight 3lb 3oz / 1.45kg
Min Weight 2lb 11oz / 1.22kg
Dims 85"x 55" (head) x 42" (foot)
216x140cm (head) x 107cm (foot)
Area 28.1 ft² / 2.61 m²
Peak Height 40" / 102cm

Min Weight 3lb 8oz / 1.59kg
Dims 85"x 68" (head) x 62" (foot)
216x173cm (head) x 158cm (foot)
Area 38.8 ft² / 3.6 m²
Peak Height 42" / 106cm
40150818

SWEET SUITE 2/3

Hitting the sweet spot between livable space and lightweight.

The Sweet Suite 2/3 is a semi-freestanding tent with incredible amounts of livable space. 2 doors and 2 vestibules offer easy access and all the gear storage you'd need. Lightweight nylon materials and featherlight poles allow the Sweet Suite to pack down light and small, but once setup you'll be living large due to the unique pole geometry.

KEY FEATURES

- Unique prebent pole geometry creates exceptional interior space at a minimum weight
- Two-door & two-vestibule design provides all the space you need
- Compact storage size takes up a minimal space in your pack
- Fast & easy hubbed pole setup
- Semi-Freestanding Design
- Stargazer Rainfly
- Burrito bag makes storing tent easy

SWEET SUITE 2

Pack Weight 3lb 10oz / 1.64kg

Min Weight 3lb 3oz / 1.45kg

Dims 85" x 51" (head) x 48" (foot)

216x130cm (head) x 122cm (foot)

Area 29.2 ft² / 2.71 m²

Peak Height 41" / 104cm

40152618

SWEET SUITE 3

Pack Weight 4lb 4oz / 1.93kg

Min Weight 3lb 12oz / 1.7kg

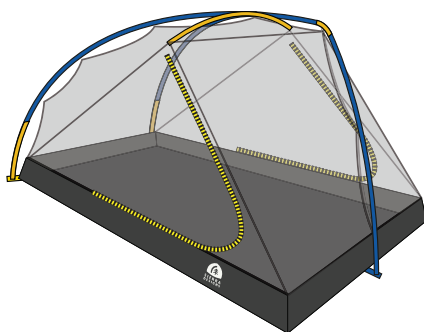

Dims 85" x 70" (head) x 67" (foot)

216x178cm (head) x 170cm (foot)

Area 40.4 ft² / 3.75 m²

Peak Height 43" / 109cm

40152718

HIGH SIDE 1/2

Forget the wrong side, wake up on the high side.

The High Side's pre-bent poles and distinct build provide a maximum amount of space and a minimum amount of weight. 12" pole sections help with efficient packing, and once set up, just extend the awning and you'll be living large.

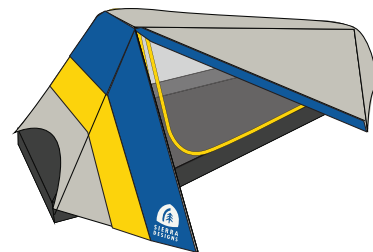

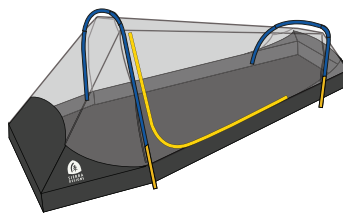

KEY FEATURES

- Pole geometry creates "high side" over door that maximizes livable space and minimizes weight
- Low profile design and compact storage size take up minimal space in your pack
- 2 Vestibule zippers allow you to create an awning, improving ventilation and providing covered storage

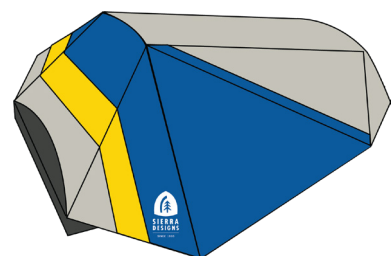

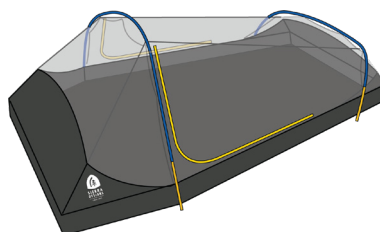

HIGH SIDE 1

Pack Weight 2lb 7oz / 1.1kg

Min Weight 2lbs 15oz / 1.33kg
Dims 55" x 88" / 140x223cm
Area 31 ft² / 2.88 m²
Peak Height 38" / 96cm
40154120

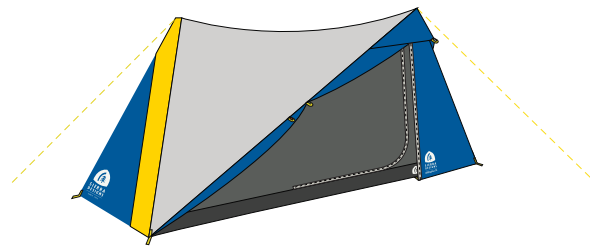

HIGH ROUTE 1/2

1 Person. Sub 2 Pounds. 3 Seasons.

How do you shave 12 ounces off an already light tent? Innovation and purpose driven design. Designed as an incredibly versatile year-round hiking shelter, the High Route is a 31 ounce ultralight shelter that utilizes trekking poles. With a laundry list of features for its weight and size, the High Route lets you travel light without worry.

KEY FEATURES

- Versatile tarp or tent configuration
- Compresses to slightly larger than a Nalgene bottle
- Offset poles and vertical walls = 1 Person Palace
- Simple, intuitive, fast pitch
- Oversized volume for more livable space
- Garage door gear closet

HIGH ROUTE 1

Pack Weight 1lb 15oz / 0.88kg

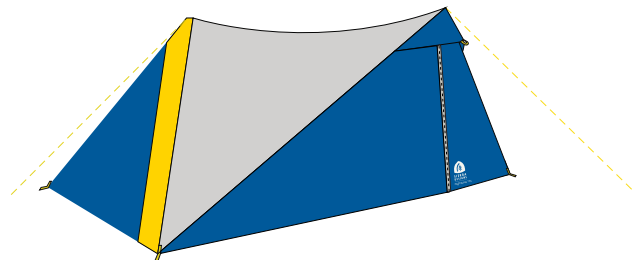

Min Weight 1lb / 0.45kg

Peak Height 48" / 122cm

40154220

METEOR 2/3/4

So much room, you'll want to extend your stay in the outdoors.

The Meteor is large and in charge, bringing you vast interior space at a minimum weight. With 2 doors and 2 vestibules there is plenty of storage for gear, and the fully freestanding design makes set up fast and easy. A ridge pole creates steep wall angles to make everything more livable, and the stargazer fly makes clear nights that much more beautiful. Upgrade your backcountry living situation.

KEY FEATURES

- Ridge pole creates steep wall angles and tons of internal space
- Two doors and two vestibules make this your go anywhere tent
- Burrito bag makes storing your tent easy
- Fast and easy 2 pole setup.

METEOR 2

Pack Weight 4lb 8oz / 2.04kg

FULL MOON 2/3

Camp Easy.

With DNA from our successful and trail tested Summer Moon, the Full Moon carries forward with an additional door and vestibule for increased gear storage and ease of use. The fully freestanding Full Moon features 2 equal length poles for easy setup, making this a clear favorite for new and experienced campers alike.

KEY FEATURES

- 2 door 2 vestibule design for ease of use and gear storage
- Fully freestanding for versatile pitch
- Simple equal pole length design makes setup a breeze
- Burrito bag makes storing tent easy

FULL MOON 2

Pack Weight 4lbs 12oz / 2.15kg

Peak Height 43" / 109cm

40157320

SUMMER MOON 2/3

Nights under a summer moon never felt more like home.

The Sierra Designs Summer Moon offers a simple, easy set up due to its equal pole length and fully freestanding design. The 1 door and 1 vestibule makes getting in and out easy as can be, and provides ample storage for gear. The raised bathtub on the back allows for a half fly, improving airflow and reducing condensation.

KEY FEATURES

- Fully freestanding design
- Large front vestibule, and high back bathtub, provides improved ventilation
- Simple equal length two pole design makes set up easy
- Burrito bag makes storing tent easy

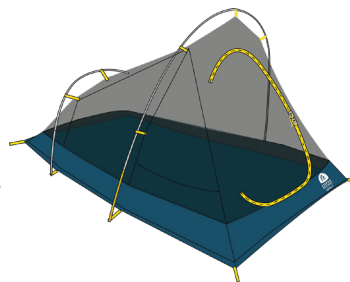

CLIP FLASHLIGHT 2

25 years of refinement.

The Clip Flashlight 2 is one of the most iconic and best-selling tents of all time due to its peak height, usable interior space, and vast gear storage. The non-freestanding 1 door 1 vestibule design with an all mesh body comes in at under 4 pounds for the whole package, and due to clever design, the fly can be porched out to create an awning. With all this awesomeness, there will be sticker shock, but in the best way possible, \$199 is hard to beat.

KEY FEATURES

- Fast and easy two pole setup
- Generous, livable space with large, full coverage vestibule
- Two full length zippers allow the fly to act as an awning
- Lightweight full mesh body
- Non-freestanding design

SUMMER MOON 2

Pack Weight 3lbs 15oz / 1.79kg

Min Weight 3lbs 7oz / 1.56kg

Dims 84" x 50" / 213 x 127cm

226x132cm (head) x 114cm (foot)

Area 30 ft² / 2.79 m²

Peak Height 42" / 106cm

40144719

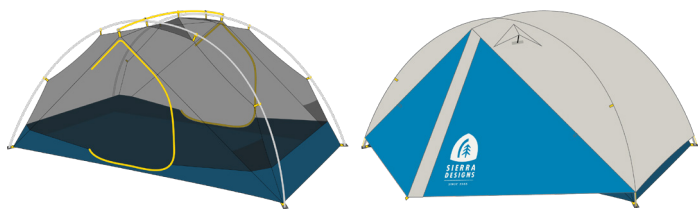

CLEARWING 2/3

Walls so steep they'd be hard to climb.

The Clearwing is a 2 door, 2 vestibule fully freestanding backpacking tent. Hoop poles over the doors provide vertical sidewalls and tons of interior space, and a full coverage, vented rainfly keeps the weather at bay. A hubless pole system allows the Clearwing to pack down small into its burrito bag.

KEY FEATURES

- Fully freestanding for easy setup
- Two doors & two vestibules for storage and easy access
- Hoop poles with ridge pole create vertical sidewalls for maximum interior space
- Efficient pole construction packs down small
- Burrito bag storage

CLEARWING 2

Pack Weight 4lb 10oz / 2.1kg

Peak Height 46" / 116.8cm
 90152919

NOMAD 4/6

Live large, live free.

The Nomad is the answer to any adventure that isn't contained in a backpack. With a generous footprint, near standing peak height, and pockets galore, you'll be comfortable no matter where you go. 2 doors and 2 vestibules give you plenty of protection and storage for gear, and the integrated window gives you views when the weather turns south.

KEY FEATURES

- Simple and strong 3 pole set up with 12mm DAC 6061 set
- 2 door 2 vestibule design for ease of use and gear storage
- Integrated window gives you views, even when closed
- Breathable body fabric and mesh reduce condensation
- Near-standing peak height for maximum livability
- Integrated doormats

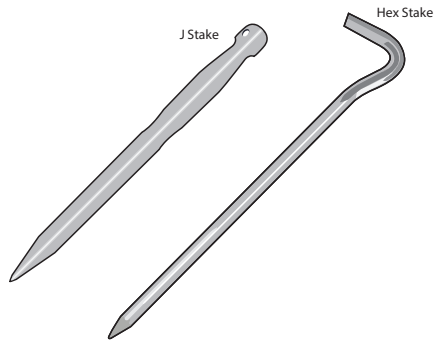

NOMAD 4

APPAREL

APPAREL INNOVATIONS

Whether they're blocking rain out on the trail or locking in warmth back at camp, our hand-picked materials keep you comfortable no matter where the adventure takes you.

DriDown™

DriDown™ is natural down insulation treated with a molecular level polymer, creating a hydrophobic finish on individual down plumes. All Sierra Designs down is DriDown™, and the result is insulation that stays dry longer, lofts better, and dries faster than untreated down.

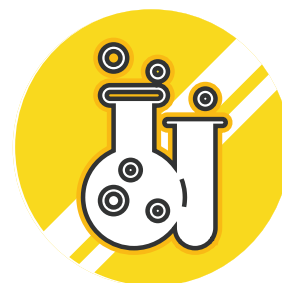

Primaloft™ Silver

Primaloft™ Silver insulation provides robust warmth, packability, and comfort in layering for all activities.

STRETCH GRID FLEECE

Stretch grid fleece construction and paneling provide unrestricted range of motion and incredible breathability, giving you a great active midlayer.

PFC-FREE DWR

PFC's are commonly used in DWR, which are great at shedding water, but are also great at being detrimental to the places we love. For 2020, our 2.5L Hurricane and 3L Stellar are entirely PFC free to minimize their impact.

Learn more about our innovation and tech through our [Training Portal](#)

HURRICANE JACKET

Make a splash and stay dry.

The Hurricane jacket is built with our 2.5L 10k/10k waterproof/breathable fabric that stands as the barrier between you and the elements. Fully featured with an adjustable hood with storm collar, underarm zips for ventilation, and articulated arms and a drop tail for comfort, the Hurricane goes beyond a minimalist shell. The best part, the Hurricane is made with PFC free fabrics and DWR.

KEY FEATURES:

- 2.5L PFC-free fabric
- 10k/10k waterproof/breathable
- Stowable, 2-way adjustable hood with storm collar for comfort
- Underarm zips for ventilation
- Articulated arms with velcro cuffs
- Drop tail extended coverage
- 2 zippered hand pockets
- Hem adjustment cinch cord

HURRICANE PANT

Rain pants for your rain dance.

The Hurricane Pant is built to move with you, not against you. With a $\frac{3}{4}$ length zipper on the side for easy on over boots, a gusseted crotch area, and articulated knees, the Hurricane protects against the elements while providing freedom of movement. An elastic waist and snap closures on the cuff help seal everything up tight.

KEY FEATURES:

- 2.5L PFC-free fabric
 - 10k/10k waterproof/breathable
 - $\frac{3}{4}$ Length side zipper for easy-on over boots
 - Snap closure cuff for secure fit
 - Fully elasticized waist with draw
- cord cinch
 - Articulated knees
 - Gusseted crotch
 - Packs into rear pocket with carabiner loop

DRIDOWN™ TECHNOLOGY

DriDown™ is natural down insulation treated with a molecular level polymer, creating a hydrophobic finish on individual down plumes. All Sierra Designs down is DriDown™, and the result is insulation that stays dry longer, lofts better, and dries faster than untreated down.

Benefits of DriDown™

With DriDown™, you'll immediately notice the increased warmth and comfort once out on the trail. Even in dry, cold conditions, DriDown™ increases performance because it resists the moisture your body naturally produces, even if you aren't actively sweating. The hydrophobic finish prevents sweat and moisture from negatively impacting loft, and therefore thermal efficiency, so you're warmer throughout the day or night. In a humid environment, the difference will be even more drastic. And best of all, our DriDown™ hydrophobic treatment is PFC free, so you can hit the trail worry free.

SIERRA JACKET

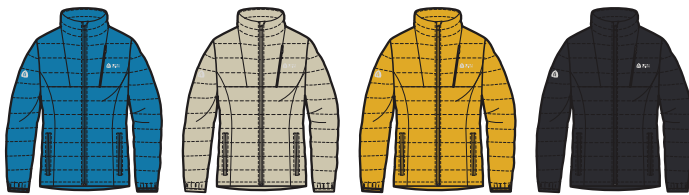

Summer in the Sierra, all year round.

Our Sierra jacket utilized 800 fill DriDown™ and a high collar to keep the cold at bay. With elastic cuffs and a cinch cord, it seals up tight!

KEY FEATURES:

- 800 Fill DriDown™
- Two zippered hand pockets
- Inside kangaroo pocket
- Insulated yoke with zippered chest pocket
- Stows into zippered pocket
- High collar increases comfort
- Bungee drawstring adjustable cinch with cord lock
- Elastic cuffs to seal in heat

STAYS DRY 10X LONGER

DriDown™ will stay dry 10 times longer than untreated down, meaning you'll be warmer in wetter environments than untreated down.

DRIES 33% FASTER

DriDown™ dries 33% faster than untreated down. We know that variability occurs on the trail, both with rates of perspiration, and weather. That's why we designed DriDown™ to dry faster, so you can be warmer.

THERMAL EFFICIENCY

DriDown™ offers superior loft and thermal efficiency. Because of its hydrophobic nature, DriDown™ will remain lofty and in turn, keep its thermal efficiency.

COLD CANYON FLEECE TUOLUMNE SWEATER

The Goldilocks of midlayers.

No matter where you go or what you're up to, the Cold Canyon's stretch grid fleece moves with you and keeps you warm, easily venting excessive heat when you need to move fast on the trail. Dual zippered hand pockets provide storage and versatility, and thumb loops keep the sleeves securely in place when you need to add some layers.

KEY FEATURES:

- Lightweight stretch grid fleece
- Breathes easily, is a great active insulator
- 2 zippered hand pockets
- Nylon windbreak panels on interior
- Thumb loops for easy layering
